

TELLURIDE NEWS - LETTER

A STATEMENT OF EVENTS COMPILED ON THE TENTH OF EACH MONTH
AT ITHACA, NEW YORK, AND EXCLUSIVELY OF INTEREST TO MEM-
BERS OF TELLURIDE ASSOCIATION.

Number 3.

May 10, 1914.

FOREWORD -- We regret the absence of a statement from Bliss. Through some slip it has not arrived in Ithaca. As compensation we are able to give a general report from Stanford.

The last issue of the News Letter for this school year will be compiled in Ithaca on June 10. Any statements intended for publication in that number should be in Ithaca by June 8.

B. A. THORNHILL, DEAN.

BOISE, IDAHO.

The following men expect to graduate this year: D. S. Wegg, M. E.; B. F. Armstrong, M. E.; P. P. Ashworth, M. E.; J. G. Miller, M. E.; McRea Parker, M. E.; C. H. Whitman, A. B.

S. S. Walcott has now been made a regular student. Up to the present time he has been registered as a special.

BEAVER BRANCH

R. G. Evans, Correspondent.

School work is making steady progress and is satisfactory in most cases. Dietzel has discontinued school work and Moore has been taken out of German and set to work reviewing elementary algebra.

The weekly class in public-speaking in which the entire Branch

participates has been very successful. A feature of the last meeting was a most interesting talk on the Diesel engine and the Idaho situation in general by W. D. Johnston.

Our commercial work in connection with the station has been improving steadily. Line trouble caused brief interruptions to service on two occasions during the month, but reports from the customers are to the effect that the service at present is better than ever before in the history of the company.

W. D. Johnston arrived April 25 to spend a few weeks in the interests of the Association. He has been able to put us in close touch with Association affairs in general. The spirit of the Branch is now better than at any other time this year. The scholastic standing of the fellows follow:

	<u>German</u>	<u>Algebra</u>	<u>English</u>
Beck	71		C
Dinkel	75		
Evans	70	Satisfactory	
Jones	Elementary Preparatory Work - Grade D.		
Kinney	76	Satisfactory	
La Fontaine	Review of Arithmetic.		
Stacy	Examinations in College Algebra and German.		
Sweeney	68	72	

CASPER, WYOMING.

H. D. Graessle, Cor.

Three branches of instruction are being carried on under the personal supervision of Mr. P. M. Nunn. Lectures are being given

on electrical theory, mechanical engineering, and manual training. Under manual training both wood and metal working are being taught. Under the plan of Mr. Nunn the broad field of each of these subjects is covered thoroughly and quickly.

During the next month the second Diesel engine unit will be installed. This will give the plant a capacity of 900 B. H. P.

Mr. L. L. Nunn was a visitor in Casper from April 19th to 21st.

One of our number - Newell Chamberlin - is in the hospital with a mild case of typhoid fever. He is in no immediate danger.

CORNELL BRANCH - April 2 - 9: Easter Vacation - the following men make visits: Armstrong, Clark, Houtz, Johnson, Landon, and Ray to New York City; Cole to Boston; Parker to Washington. During the week the Timpanagos, our motor boat, is overhauled and given a coat of battleship grey.

Apr. 7: Dean Thornhill, Mrs. Thornhill and daughter arrive to remain until May 1st.

Sat. Apr. 11: The Branch gives a reception to the Cornell faculty to meet Mr. and Mrs. Charles Whitehair. Mr Whitehair is the new Resident Secretary of the Cornell University Christian Association, of which McRea Parker is student president. The entire faculty are invited - we receive from 3 until 6 p.m.

Sun. Apr. 12: Messrs. L. L. Nunn, Waldo and Sanders arrive at 7:55 a.m., and remain until Monday evening.

Mon. Apr. 13: Ray is elected manager of Telluride baseball interests. He makes arrangements to put a team into the Cornell Inter-Fraternity League.

Tues. Apr. 14; Oscar Johnson shows his artistic temperament by standing in line from 4 until 8 a.m. to get tickets for the Spring Music Festival to be held during the last three days of April - Mme. Schuman-Heink and Chicago Symphony Orchestra are headliners.

Apr. 14: The cousin and aunt of Edwards, from Pennsylvania, visit us for a few days.

Apr. 18: Tennis court is put in shape, and the boat placed in the water. Spring has come.

Apr. 18: Mr. Humphries from New York City is here as our guest. He is a prospective Association member.

Apr. 23: Scotty the Rope King takes charge of the house and of us after we come up from dinner. Scotty is becoming a well-known campus character. He is an old Scotch sailor with an accent directly imported. His main accomplishments are rope tricks, Scotch songs and passing the hat. Scotty takes precedence over our Effective Speaking Class.

Tues. Apr. 28: First League Baseball. Theta Xi vs Telluride. Telluride Line-Up: Ashworth, Houtz, Walcott, Landon, Ray, Howard, Pugsley, Clark, Tucker. Theta Xi wins 5 - 0.

Apr. 29: Miller returns from Celina, Texas where he has been on a two weeks trip concerning power interests in that vicinity.

Apr. 29: Ellms makes a position on the first Varsity crew.

Apr. 30: Baseball; Telluride vs Delta Upsilon. Telluride wins 10 - 8. Landon sprains his knee while at bat. The hurt is not serious but will put him out of baseball for the season.

Apr. 30: Gilbert Miller is awarded the University Fellowship in Electrical Engineering. This fellowship is one of three granted yearly by the University and gives \$500 for research work and graduate study in engineering problems. It is awarded on a basis of meritorious work determined through a vote by the faculty of the engineering college.

IN GENERAL; The month at Cornell has been a good one. It started with Mr. Nunns visit and ends with the award to Miller of a fellowship and the placing of Ellms on first Varsity crew.

During the month the annual report of the President of Cornell University has appeared. In it there is a comparison of the scholastic standing of different groups of university men, such as fraternities, clubs, etc. In this list are fifty one groups, and Telluride Association, with an average grade of 76.1, ranks fourth. In the last preceding report we ranked third with an average of 76.6. There seems to have been a general speeding up by the fellows and it is Dean Thornhills opinion that this second term will see the lag more than made up.

STANFORD UNIVERSITY.

WILL. L. CONE, COR.

There has been no organization as a branch by the Association men at Stanford this year; as the men have been not only pretty well scattered but also pretty busy. This semester Ferris, Cone and Shepard moved into Elms Hall, and solved the problem of rooms

for them in the future. The members have gotten together enough for discussion of what news of Association affairs has reached us here.

Ferris made the break and "queened" to the Junior Opera. Nothing else startling has happened to us.

We are all very busy preparing for final exams which start the seventh of May. After May 15th our addresses, as far as we now know will be : J. A. Shepard, Box 1643, Salt Lake City; G. F. Ferris, Stanford University, California; E. S. Bird, Redwood City, California, and Will L. Cone, Springville, Utah.
