

telluride NEWSLETTER

VOLUME XLVI

AUGUST 1959, HARTFORD, CONN.

NUMBER 1

Dr. Erik K. Reed Named SAA Head

Dr. Erik K. Reed was elected to the presidency for 1960-61 of the Society for American Archaeology at the annual national meeting of the Society April 30 at the University of Utah. Reed is regional chief of interpretation, National Park Service, in Santa Fe.

Upon graduation from Central High School in Washington at the age of 13, Reed entered Deep Springs and studied there three years before he received his A.B. at George Washington University when 18. He was in the Graduate School at Harvard University (1932-34) for advanced work in anthropology (M.A., 1933; Ph.D., completing a dissertation ten years after taking the general examination, 1944).

Reed entered the National Park Service in 1935. He has published more than a hundred articles, notes, and reviews, including both technical papers and semi-popular articles. He has served as assistant editor of two major archaeological periodicals, *American Antiquity* and the *American Journal of Archaeology*. The Department of Anthropology of the University of Utah has recently published his *Excavations in Mancos Canyon, Colorado*.

Reed has worked on archaeological surveys and excavations in Florida, Texas, New Mexico, Arizona, and Colorado. In addition, he spent the winter of 1952 in a special study, on an Interior Department assignment, in the Marianas and made an expedition to the Galapagos during the winter of 1953. A few months ago, he was in Peru on a special assignment for UNESCO in connection with the preservation of archaeological ruins. He is a member of the board of the Laboratory of Anthropology, Inc., and is president of the Spanish Colonial Arts Society, Inc.

New Recruitment Schedule Set for Summer Programs

Information about the Telluride Association Summer Programs is being sent this month to 24,000 secondary schools throughout the country, through the co-operation of the ETS (Educational Testing Service).

The wide distribution is part of a new recruitment method proposed by Chancellor E. M. Johnson, and adopted by the 1959 Convention.

Core of the system is a new Scholastic Aptitude Test being offered by ETS to high school juniors in October this year. An estimated 500,000 will take the test.

Recruitment activities by TA alumni will be started early in the fall, and prospective applicants will be asked to take the October tests and have their scores sent to the Summer Program directors. It is hoped some will read of the program through the wide pamphlet distribution, and will have scores sent in before any personal contact is established.

Candidates who take the October tests and later learn of the Summer Programs can have their grades forwarded later, or can take a mid-December battery of tests. The early start will permit interviewing at a leisurely pace early in the new year, and will allow an early acceptance date to catch those candidates who plan their summers far in advance.

It is also hoped that the wide distribution, with a probable increase in candidates, will permit a higher cut-off point in test scores accepted. This year the candidate with the lowest SAT score accepted had 1302, and last year's low man scored 1263. This is higher than the cutoff point of all Cornell colleges, but it is thought that standards may be raised still higher.

The 1959 Convention approved preliminary plans for two Summer Programs again in 1960, at Deep Springs and at Ithaca. Authority was given the directors to inquire into use of a West Coast campus fraternity house in case

Deep Springs should not be available in 1961, although a resolution was passed urging continued use of Deep Springs for the program as an avenue of cooperation between the two Nunn institutions.

In another attempt to streamline summer program planning, a Convention committee completed the major faculty appointments for the 1960 program, and the 1960 directors have been instructed to hire 1961 faculty before the next Convention.

In other actions, the 1959 Convention:

- Authorized a three-man committee to hire an executive secretary to work with Chancellor Johnson during the year before his retirement, while continuing negotiations for a full-time chancellor.
- Adopted a 1959-60 budget calling for an expenditure of \$83,127.69 from income, \$4,000 from unappropriated income and \$2,000 from the maintenance reserve.
- Heard a report by the Finance Committee on the possible advantages of using an investment counsellor, or investing in mutual funds. The committee urged further study and a report to next year's Convention. A Newsletter article later this year will explore the proposal in more detail.

(Continued on page two)

Charles Christenson Elected President

Charles J. Christenson was elected president of Telluride Association at the 1959 Convention. Elected to serve with him were vicepresident, Michael J. Moravcsik; secretary, Seymour H. Mausekopf; and custodians, Theodore M. Hofmann, Roy Pierce, David A. Hodges, Brandt Kehoe, James P. Naismith and David C. Cole.

News of Telluride Associates

Convention Actions

(Continued from page one)

- Heard a report from the Custodians that 5,000 shares of Utah Power stock have been sold, realizing \$166,063.89, and recommending that the remaining 15,815 shares be sold off at intervals of six months to a year, in similar size blocks.

- Heard a report that the Telluride Corporation Growth Fund, inaugurated two years ago to see if funds outside the Association portfolio could be invested to bring a higher yield, has received very little support this year. A resolution was passed urging more generous support from members and associates before the five-year trial period runs out.

- Approved a 29-man Cornell Branch for the coming academic year. The graduate guest committee had invited four professors, two for the full year and two for the fall term only. The pre-convention preferment committee had invited five 1958 Summer Program graduates, and Convention issued 20 more preferment invitations.

Academic honors and scholarships granted by Convention included naming Reese P. Miller to be the Lincoln College Exchange Scholar; Ronald Dallas to be the Sidgwick Award recipient, and David A. Hodges to be the George Lincoln Burr Scholar. Cash awards of \$800 and \$850, respectively, were made for the latter two.

The 1960 Convention will be held at Ithaca next June 11, continuing the policy begun this year of convening on the Saturday before Cornell graduation instead of graduation day, Monday.

Amendment Limits Budget Allotments

A Constitutional amendment adopted by the 1959 Convention places a limitation on the amount any Convention may appropriate.

Under the Constitution as amended, appropriations must not exceed 75 per cent of the previous year's income, plus any unappropriated income from the previous fiscal year.

Authorizations to expend from appropriated reserves, built up in previous years, are not included in the new restriction.

Woodrow Wilson National Fellowships have been awarded to STEPHEN A. SCHUKER and RANDALL C. REID. The purpose of the Foundation is to recruit and support promising scholars for their first year of graduate study who plan to become teachers. Each Wilson Fellow receives a living allowance of \$1,500 and tuition and fees. Schuker did his undergraduate work at Cornell and will begin graduate study in history at Harvard in the autumn; Reid took his undergraduate work at Deep Springs and San Francisco State College and will do graduate study in English at Stanford.

* * *

DR. ALLEN WHITING will be a visiting associate professor at Columbia University for the spring term of 1960, on leave from The Rand Corporation, teaching graduate courses in United States foreign policy and in Chinese political institutions. His book: *Sinkiang Pawn or Pivot* (co-authored with Gen. Sheng Shih-ts'ai) came out last November from Michigan State University Press.

* * *

AUSTIN H. KIPLINGER has been elected president of Kiplinger Washington Editors, Inc., publishers of the weekly Kiplinger Washington Letter and the monthly Changing Times Magazine. A graduate of Cornell in 1939 and a member of the Cornell University Council, Kiplinger has had wide experience in publications, television, and radio.

* * *

DR. DONALD J. REIS will spend the next 15 months in Europe for further training in the neurological sciences. He will spend six months in the neuropathology laboratories at the National Hospital for Nervous Diseases at Queen Square, London; then another half year at Karolinska Institute in Stockholm doing clinical neurophysiology. Reis won a Fulbright Grant last February but resigned it to accept a \$6,000 postdoctoral fellowship in brain research granted him by the Cerebral Palsy Educational and Research Foundation.

Dr. Reis completed in June his work as chief resident in neurology on the Harvard Neurological Unit at the Boston City Hospital, where he also held an appointment as teaching fellow in neurology at the Harvard Medical School. Upon his return from Europe in the autumn of 1960, Reis will go to the National Institutes of Health to do research in neurophysiology for two years as a commissioned officer in the Public Health Corps, in fulfillment of his military service.

ROBERT FORTUINE, McGill Medical School, spent the summer with the Grenfell Mission at the main hospital in St. Anthony, Newfoundland, about 300 miles north of Gander. Fortuine has been elected class president for next year and has been elected a founding member of the Canadian Society for the Study of the History and Philosophy of Science. The Canadian Medical Assn. Journal and the McGill Medical Journal have accepted for publication three articles by Fortuine.

* * *

NOEL BURLESON has received from the Organization of American States and the Mexican Government a grant of approximately \$2500 for a June 1959-1960 year of anthropological field work to study the social change resulting from industrialization. Burleson, with his M.A. in anthropology from the University of London, passed in May his qualifying examination at Harvard for his doctorate. He had already done considerable field work in Mexico.

* * *

THOMAS L. KINNEY has accepted appointment to an instructorship in English at Bowling Green State University, Bowling Green, Ohio. He received his Ph.D. from the University of Michigan this spring, where he studied Middle English literature, Chaucer, and medieval literature.

* * *

The historical files have received from ROBERT L. BULL the bibliography of 27 books, pamphlets, and articles produced by him since the spring of 1955. Bull is agent in marketing of the Dept. of Agricultural Economics at the University of Delaware. Most of the Bulliana deals with the packaging and marketing of agricultural products. He is editor of the "Delaware Retailer," a food merchandising weekly.

* * *

Lawyer BERTIL PETERSON, after fifteen years with Artillery, has transferred to the Judge Advocate Corps (27th Armored Division, National Guard) where he is a major. During the past year he has taken a course in Inorganic Chemistry at the University of Buffalo and Biology at Canisius College, being joined in the latter course by Lawyer Wife Jean. Peterson plans a course or two in anatomy next year and will resume his abandoned piano lessons.

DR. ELIODORO G. ROBLES has returned home to the Philippines after more than five years of work and study in the U. S. He is at present teaching at the Far Eastern University — enrolment about 42,000 students — handling International Trade, America in World Politics, Governments and Politics of Southeast Asia, and Economic Analysis. Southeast Asia is his field of concentration.

After leaving Cornell Branch in 1954, Robles studied at the Fletcher School of Law and Diplomacy, and for 18 months was assistant-curator of the Filipiniana Division of the Newberry Library in Chicago while working on his thesis.

* * *

DR. ROBERT L. SPROULL, widely recognized solid-state physicist, will direct the newly established Graduate Laboratory of Solid State Physics at Cornell this fall when he returns from Brussels, where he is finishing his sabbatic year.

Sproull served as an assistant in physics at Cornell in 1942 and 1943 (Ph.D. 1943), and for the next three years was a research assistant for the Radio Corporation of America. He has been editor of the *Journal of Applied Physics* and is author of a widely used text on modern physics for engineers. He is a member of advisory committees on solid state physics for the Office of Naval Research and the Oak Ridge National Laboratory, and past secretary and chairman of the Division of Electron Physics of the American Physical Society. Sproull was elected president of the Association at the 1945 Convention and served two terms and currently serves as one of the financial advisers to the Association.

* * *

HAROLD "SENATOR" COLE and wife Mabel have just returned to the U. S. from Korea where Cole worked the past year with an American engineering firm contracting with the Korean Government to furnish engineering assistance in the rehabilitation of the power system. Cole retired from the Detroit Edison Company before going to Korea. When the Coles arrived in Seoul, they found JOHN C. DAMON working as Asst. Chief of the Power Division of the Rehabilitation Engineer's Office of the Office of Economic Coordination. Damon is another "retired" engineer.

* * *

DIRECTOR EDWIN C. RUST of the Memphis Academy of Arts participated April 26 in the dedication of the spacious and handsome new home of the Academy of which he has been director for ten years. In addition to his administrative duties, Rust does much sculpturing on commission. His work appears widely on public and business buildings and in private collections.

Vital Statistics

Mrs. Duane J. Carnes died at La Jolla, Calif., July 11. She and Duane were married in April, 1934, and had two children; Martha, 19, and Thomas, 14.

* * *

PETER CZAP (Cornell Branch '54) received his doctorate in Russian history at Cornell in June. Commencing in September, Czap will be assistant professor of history at the College of William and Mary in Williamsburg, Virginia. On June 15, he was married to Miss Margot Hebbard (Cornell '59) of Trenton, New Jersey.

* * *

TATSURO KUNUGI of the Cornell Branch and Miss Sachiko Mori were married June 8 at Evansville, Indiana. "Ta-chan" and "Chiko" completed their study for their master's degree in international relations at Cornell and in organ music at DePauw, respectively.

* * *

The JACK SHEINKMANS report the birth of Joshua Louis on April 22 in New York City.

* * *

DR. ORVILLE J. SWEETING reports the birth of daughter, Barbara Rose, weight 8 lbs. 13 oz., at Grace-New Haven Hospital on April 22, 1959. Other young Sweetings: Janet Ruth, 12, and Richard John, 9.

Sweeting has sent to the historical files "Organization in Extruded Polyethylene Films," prepared in collaboration with two associates with Olin Mathieson Chemical Corp. and published in the *Journal of Applied Polymer Science*, Vol. 1, Issue No. 1, pp. 91-100 (1959).

ELDER KARL E. LIND (TASP 1955) is serving a two and one-half year mission for the Latter-Day Saints Church in

Dodge Tells Progress Of T.C. Growth Fund

During the past year the principal of the Telluride Corporation Growth Fund has increased from \$2,670.47 to \$3,172.54. Income of \$51.00 which has been transferred to the Trust Fund Income Account was also received during this period.

An article in the *Newsletter* last fall describing the Growth Fund and appealing for contributions failed to evoke any noticeable response. As in the past, contributions which have been made to the Fund have been limited in quantity and have come from a very small group of members and friends. These totaled only \$95.00 during the past year and came from four persons.

If the Growth Fund is to succeed in its purpose before the five-year trial period runs out, more generous support from a broader group of members and associates must be forthcoming. All of you who can are urged to make some contribution to the Fund above and beyond your contribution to New Funds during the coming year.

NORTON T. DODGE
Investment Manager

Mexico after completing his military service and two years at the University of Utah.

DR. FRANK MONAGHAN is the historical consultant of the Hudson-Champlain Celebration Commission, a federal agency to direct and coordinate the sundry celebrations being held in various eastern states to mark the 350th year of significant history. Monaghan was the historian of the Alexander Hamilton Bicentennial Commission and is currently in charge of much of the basic planning and organization of the first large-scale exhibition devoted to "The Conquest of Outer Space."

New Members Elected To TA Membership

The following men were elected to membership in Telluride Association at the 1959 Convention: Christopher N. Breiseth, Sam Dugan, Nicholas K. Hooper, Tatsuro Kunugi, Seymour Mauskopf, Peter R. Mogielnicki and Robley C. Williams, Jr.

The resignations of the following members were accepted: James E. Bostwick, John W. Darley, Jr., James R. Olin, Gareth W. Sadler, Albert N. Votaw and Martin Washburn.

Membership at the close of Convention totalled 70.

Report of Outgoing President Irwin

In reviewing the activities of the Association this past year, some substantial achievements can be recorded. Two summer programs for high school juniors were held in 1958, one at Deep Springs and the other at Cornell Branch. Both programs were successful and gave evidence of what can be accomplished when Association, Trustees, friends, and alumni are given an unusual program on which to focus their attention. Some lessons were learned from last year. For example, it is probably wise to give some

(Continued on page 4)

President Irwin

(Continued from page 3)

attention to the size of the faculty and their families in staffing a program. More family and staff than students is not only expensive, but can create an impression with some visitors that our Summer Program is not a serious educational endeavor. Planning for the Programs in 1959 was less well organized than previously, and it is hoped that a return to the former methods of operating the Board of Directors will result in a better organized Program that deserves the support of our members and friends rather than commands them to cooperate by telegram. Substantial progress has been made for the Programs at Deep Springs and Cornell Branch in 1960, and it is hoped before Convention closes these plans will be completed.

Your President attended both meetings of the Trustees of Deep Springs this last academic year at their gracious invitation. It has been his policy to refrain from commenting on the internal affairs of Deep Springs at their Trustee's meetings on the ground that this is the province of the Deep Springs Board. On behalf of the Association he has attempted to develop those areas of mutual concern to both institutions, such as alumni relations and recruiting students and faculty. Suffice to say here that under the direction of President William Fort, Jr., this past year at Deep Springs has been an unusual one which could have been expected under the circumstances.

The election of alumnus ROBERT AIRD to the Board is to be commended. The Board is now complete in number, and with the addition of this "westerner" it will enable more Trustees to attend Board meetings. The absence of anyone of them makes the work of the Board especially difficult.

Once again we have received applications from students at Deep Springs for preferment and membership in TA. These applications, of course, will be given the judicious consideration afforded all applications. We welcome the interest these students show in the work of the Association.

The President has had an opportunity to visit Cornell Branch a number of times this year. His general impression has been one of continued development with substantial progress still to be made. Action by this Convention can contribute immeasurably to the growth of the Branch. This institution, in my opinion, should not be made into "another house on the hill," as one faculty member recently described it; nor should we as trustees focus our attention only on the selection of "bright" students as measured by test scores. Each trustee has a responsibility to make certain his affirmative vote on membership and preferment candidates is based on his judgment this candidate will make a positive contribution to the Branch and the Association. Failure to maintain these standards has permitted the selection of some candidates in the past who if they do not make a negative contribution to the Branch or the Association, contribute so little as to make the work of others more difficult. This is no plea for uniformity of attitudes; rather, it is a reminder of the qualities in candidates we are seeking when deliberate on these matters.

The estate of alumnus L. L. VINCENT has been distributed. We now carry in our accounts 950 shares of Mivinto Corporation at a value of \$73,482.50. A dividend of 9,500 pesos was declared in February, and negotiations are underway with the Philippine government to remit some of this money to us in dollars. A resolution commending the work of Mr. Karl Kreutz, President of Mivinto and

manager of the Singer Sewing Machine Co. in the Philippines, will be submitted later in the proceedings because of his efforts devoted to protecting our interests and helping us to obtain the benefits from Mr. Vincent's bequest.

The work of the Purpose and Plan Committee and the Chancellor's Succession Committee will be reviewed in their reports.

It is advisable, I think, to mention some of the issues to be discussed at this Convention. I do not consider them so burning as to require the aid of a volunteer fire department. They do deserve your careful consideration. The report of the Chancellor's Succession Committee will be considered early in Convention without referral to any Convention committee; likewise a discussion of the Purpose and Plan Committee will be held. This should enable the work of the Convention committees to flow more smoothly and perhaps be more productive. The Finance Committee will review the work of the Custodians and will discuss the advisability of securing professional management of our investments. The work of the Cornell Branch Committee is traditional; likewise Membership and Preferment. This year the Membership Committee is instructed to pass on the preferment applications of the candidates they interview. Those interested in developments at Deep Springs may wish to hear the comments of students, former, faculty and me as well as any visiting Trustees of our sister institution. The Program and Operations Committee will have a number of issues to review and should devote its attention to finding better ways of administration of certain programs and the suitability of others in view of the purpose and plan of the Association. The election of officers will occur on Monday or Tuesday. It is hoped Convention will adjourn on Wednesday.
